

# Malcolm, perhaps you haven't heard us clearly.

In Wentworth, we want a nation with faster, better internet. Not just for ourselves, but for all Australians.

We've done the numbers and when it comes to investing in Australia's future, fibre to the premises is the clear choice: it's 20 times faster, costs just 1/3 more than fibre to the node and is supported by a strong majority.

**It's an investment for all Australians,  
not just a small handful.**

**Malcolm, increase the  
share of FTTP for a more  
equal broadband network.**
